

Start with ifcSQL_Tools

Microsoft SQL server (MSSQL) and SQL Server Management Studio (SSMS)

Download and install:

- Microsoft SQL Server Express 22
(<https://www.microsoft.com/it-it/download/details.aspx?id=104781>)
- SQL Server Management Studio 20
(<https://learn.microsoft.com/it-it/ssms/release-notes-20>)

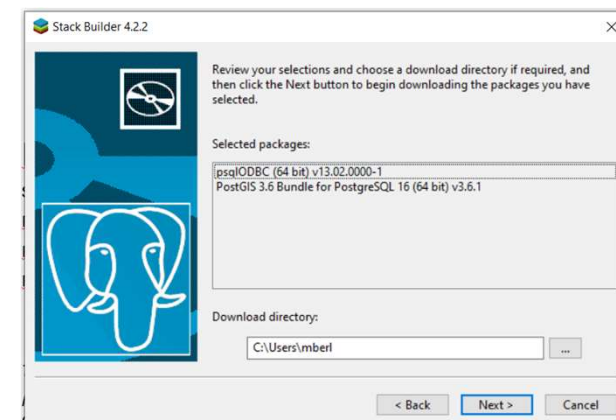

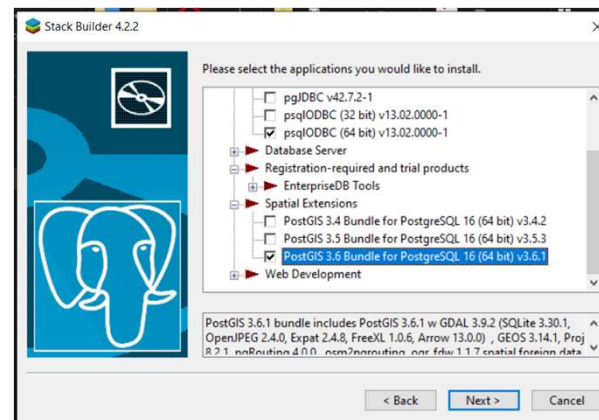

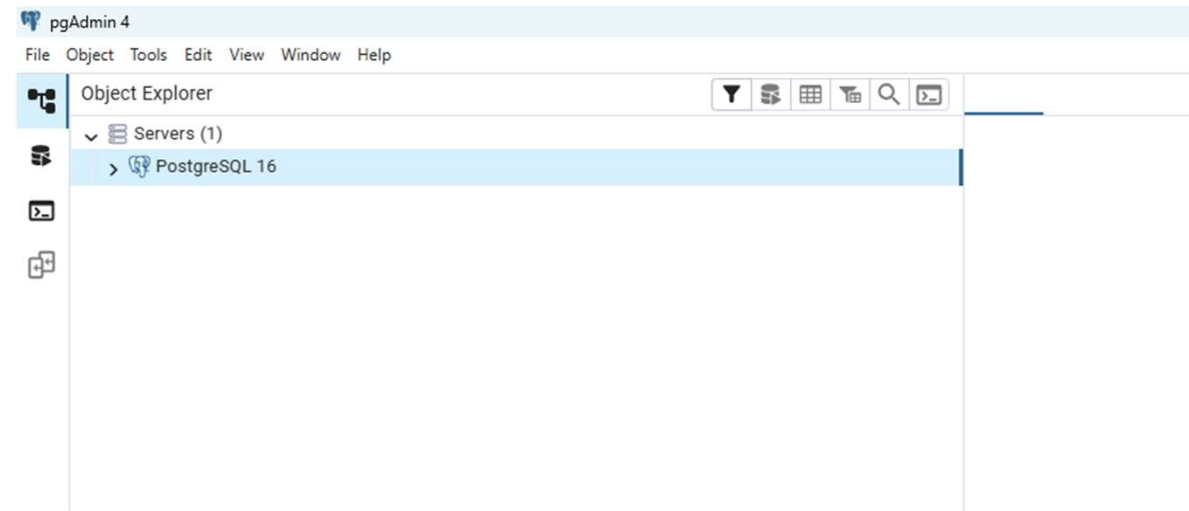

PostgreSQL + pgadmin

Download and install:

- PostgreSQL 16
- Pgadmin
- PostGIS

Download and install everything together:

<https://www.enterprisedb.com/downloads/postgres-postgresql-downloads>

1.ifcSQL_Installation_MSSQL.bat

Use the «ifcSQL_Installation_MSSQL» to install ifcSQL into MSSQL.

Press a key until the process is finish.

The process may take some minutes.

```
ifcSQL Database Installation

=====
      ifcSQL Database Configuration and Installation
=====

Format example: PC-NAME\SQLEXPRESS

Enter your SQL Server name: DESKTOP-D9BTGCS\SQLEXPRESS01_
```

```

ifcSQL Database Installation

=====
ifcSQL Database Configuration and Installation
=====

Format example: PC-NAME\SQLEXPRESS

Enter your SQL Server name: DESKTOP-D9BTGCS\SQLEXPRESS01

=====
Server set to: DESKTOP-D9BTGCS\SQLEXPRESS01
Starting the procedure...

Note: The procedure will pause several times to show progress.
Press "Enter" whenever prompted to continue.

=====

--- PHASE 1: Database Creation ---
Premere un tasto per continuare . . .

```

[illegible]

Database generated successfully

The screenshot shows the Microsoft SQL Server Management Studio interface. The title bar indicates the connection is to 'ifcSQL' on 'WINDOWS11\SQLEXPRESS'. The Object Explorer on the left shows a tree view of the database schema, including tables like 'System Tables', 'File Tables', 'External Tables', 'Graph Tables', and various IFC-related tables. The central query window displays the following SQL query:

```
USE [ifcSQL]
GO

SELECT [ProjectId]
      ,[ProjectName]
      ,[ProjectDescription]
      ,[ProjectGroupId]
      ,[SpecificationId]
      ,[Author]
      ,[Organization]
      ,[OriginatingSystem]
      ,[Documentation]
      ,[ParentProjectId]
      ,[ProjectTypeId]
FROM [ifcProject].[Project]
GO
```

The bottom pane shows the query results as a table with 7 rows. The status bar at the bottom indicates 'Query executed successfully.' and '7 rows'.

	ProjectId	ProjectName	ProjectDescription	ProjectGroupId	SpecificationId	Author	Organization	OriginatingSystem	Documentation	ParentProjectId	ProjectTypeId
1	0	-	-	0	40	-	-	-	-	0	0
2	1001	IFC2x3	IFC2x3 Schema	1	23	NULL	NULL	NULL	NULL	0	0
3	1002	IFC4	IFC4 Schema	1	40	NULL	NULL	NULL	NULL	0	0
4	1003	IFC4x1	IFC4x1 Schema	1	41	NULL	NULL	NULL	NULL	0	0
5	1004	IFC4x2	IFC4x2 Schema	1	42	NULL	NULL	NULL	NULL	0	0
6	1005	IFC4x3	IFC4x3 Schema	1	43	NULL	NULL	NULL	NULL	0	0
7	1006	hello_project_output	IFC4	4	40	Bernhard Simon Bock, Friedrich Eder	https://github.com/ifcSharp			0	0

Create a USER in MSSQL

Follow the «2.Create a user in MSSQL» guideline.

Summary of the step:

- Create an MSSQL user with SQL server authentication and password.
- Give the user administrator privileges.
- Set up access with mixed authentication (SQL server + Windows).
- Verify that the user can log in to MSSQL.

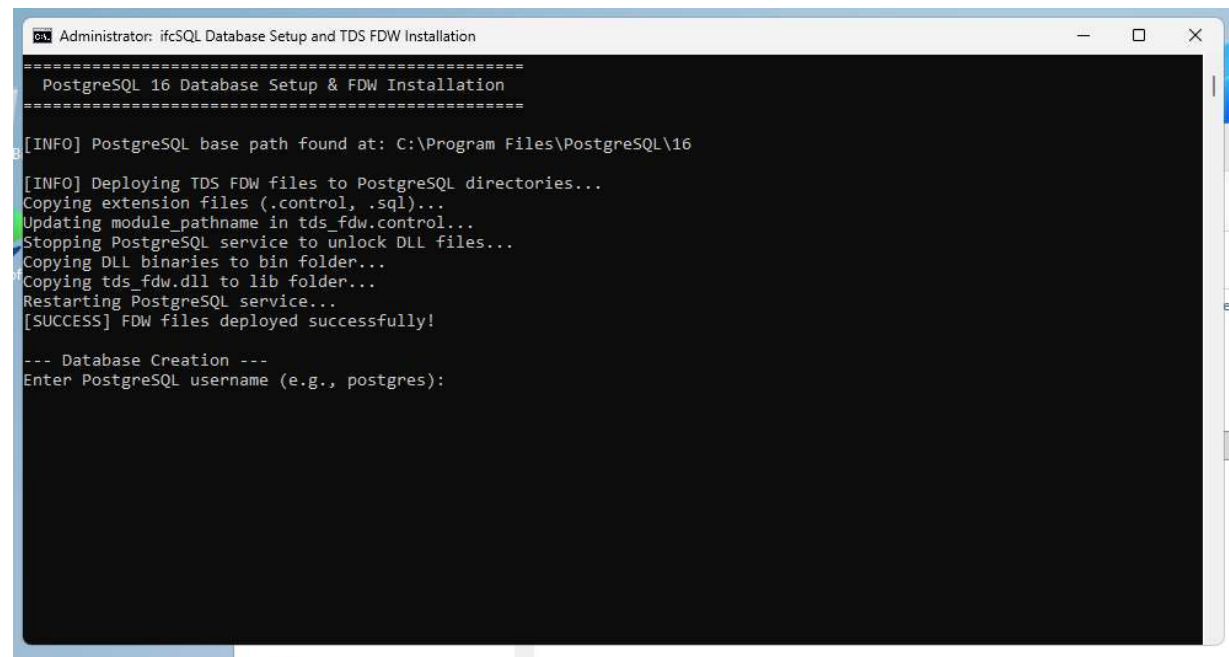

3.ifcSQL_Installation_PostgreSQL.bat

Use the «3.ifcSQL_Installation_PostgreSQL»
to install ifcSQL in PostgreSQL.

Follow the instruction in the bat.

REMEBER: run as administrator the bat file.

```
Administrator: ifcSQL Database Setup and TDS FDW Installation

=====
PostgreSQL 16 Database Setup & FDW Installation
=====

[INFO] PostgreSQL base path found at: C:\Program Files\PostgreSQL\16
[INFO] Deploying TDS FDW files to PostgreSQL directories...
Copying extension files (.control, .sql)...
Updating module_pathname in tds_fdw.control...
Stopping PostgreSQL service to unlock DLL files...
Copying DLL binaries to bin folder...
Copying tds_fdw.dll to lib folder...
Restarting PostgreSQL service...
[SUCCESS] FDW files deployed successfully!

--- Database Creation ---
Enter PostgreSQL username (e.g., postgres):
```

Copy the folder of the plugin in the plugin directory of QGIS
and enable ifcSQL Tools
